

ROCKMORE INTERNATIONAL

Xtreme Series Button Bits

with
FA design carbide

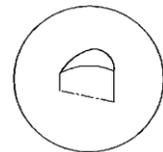

For extreme **HARD** and **ABRASIVE** rock conditions
in surface drilling – quarrying, mining, construction

Available in diameters 102mm – 127mm (4" – 5")
Standard body or Retrac configuration

Xtreme design characteristics:

- Flat-Face head configuration
- Aggressive wing profile design
- **TURBO** design perimeter flush grooves
- Patented **FA** style carbide profile design

FA design
carbide profile

Xtreme performance characteristics:

- Longer sustained bit life in hard and abrasive conditions
- Reduced face, perimeter, and body wear
- Improved chip removal resulting from modified **TURBO** design perimeter flush grooves
- Enhanced perimeter wear characteristics resulting from new **TURBO** flush grooves
- Increased penetration rate achieved by new Flat-Face configuration
- Longer button life from new **FA** style carbide design
