

# STARTER GUIDE TUBE

## STRAIGHT-HOLE DRILLING

### Available Female Threads:

- T45
- T51
- GT60
- XT45
- T51

### Available Lengths (L):

- 3660mm (12')
- 4270mm (14')
- Per request

### Available Male Threads:

- T45
- T51
- GT60
- XT45
- T51

64mm (2-1/2") & 76mm (3") Diameters (D)

Replaceable Female End

Replaceable Male End

## MODULAR 3-PIECE DESIGN

- ◆ Modular design: Thread ends can be changed to suit needed application
- ◆ Replaceable female and male thread ends easily assembled to center tube
- ◆ Superior performance compared to standard guide tubes
- ◆ 92mm to 152mm (3-5/8" to 6") bit diameters
- ◆ Optimal for unconsolidated rock conditions
- ◆ Male/Female (MF) design reduces thread wear
- ◆ Diameter of guide tube is larger and more rigid than standard drill rods, resulting in straighter holes
- ◆ Stronger thread connections, resulting in less breakages
- ◆ Improved energy transfer
- ◆ Increased drilling efficiency reduces operating costs
- ◆ Extended service life of entire drill string
