

VECTOR ROD SYSTEM XT THREAD

Vector Rod System with XT Thread Suitable for Male/Female (MF) Extension Rod Systems

Features:

- Design advancement of "T" style thread
- XT38, XT45, & XT51 for MF rods
- XT thread compatible with "T" profile/thread
- Two Cylindrical Contact Zones in front and rear of threads
- Guided thread feature

Benefits:

- Longer thread life; Easier thread breakout; Straighter holes
- Suited for larger and deeper blast holes
- Reverse compatibility with standard "T" style threads
- Straighter holes; Reduced hole deviation; Improved thread grease retention on thread pitches
- Minimized impact duration ("rattling") required to uncouple connections; Cooler couplings; Longer thread life
