Dear valued customer!

We proudly present you the first newsletter of Rockmore International Austria, and the special feature on this one will be a part of our external sales department.

Tailor-made advises or support at the jobsite, is for us a very important service.

In order to maintain this service to our clients, we have technical-sales-employees available, to support your needs with the Know-How in the different applications and with the experience what is possible on behalf of the production of rock drilling tools. These features enable us, to support you with the best possible technical help combined with high personal efforts.

Let us introduce them briefly:

Wolfgang Deutschmann

Since more than 12 years, Wolfgang Deutschmann is working for us as a technical advisor.

Before joining Rockmore, he collected 20 years of experience as a foreman in several tunneling projects all across Europe. Just to name a few of them: Gotthardtunnel (Switzerland), Mine Aljustrel (Portugal), and several projects in Iceland and Finland. Wolfgang has learned different applications and requirements from the roots, and can support your needs in all kind of tunneling projects, if it comes to help choosing the correct tools for your specific needs.

Michael Edlinger

Michael Edlinger is travelling since 2009 the world, on the behalf of Rockmore, from Africa via Europe to China. His career started, after finishing the mechanical engineering school, as a service technician in South Africa in the underground coal mining sector. Afterwards he joined a

well-known manufacturer for DTH drill rigs and worked his way through from service manager to the market-offering-manager for CIS, India, China, Asia and Australia. Besides of supporting local offices and distributors, also the training on DTH machines and tools was a part of his responsibilities.

Michael will be glad to help and support all our international customers, whenever you require help.

Martin Traumüller

Since 2019 Martin Traumüller is a member of the Rockmore-team, and there to strengthen the support of the international customers.

Martin has also finished the mechanical engineering school, and at his first working place, he fell in love with the mining sector. During his work he was able to improve his skills in the development and sales of surface and underground drilling rigs. He was handling accounts in Europe, America and Australia, and supported the customers helping them to choose the correct rig for the application, followed by the startup, and if needed helping on trouble-shooting. Martin will be also travelling for us now the Rockmore-world, and will be available for your requirements.
